

FIRST COMMERCIAL APPLICATION

TerpSmooth Overview

TerpSmooth is the first commercial application of the TNT platform — a patent-pending dissolvable strip designed to reduce perceived harshness while preserving terpene flavor.

What it is

- Cannabis accessory — not cannabis, not THC, not CBD
- Used alongside cannabis products without changing the underlying product
- Patent-pending sensory modulation via the TIM platform

What it does

- Reduces perceived harshness on inhalation
- Reduces throat impact
- Preserves terpene flavor and aroma signature

Who it's for

- Dispensaries — a category-defining accessory SKU
- Cannabis brands — co-branded and white-label opportunities
- Distributors — wholesale conversations open

Compliance positioning

TerpSmooth is classified as a cannabis accessory. It contains no cannabinoids and is sold independently of any cannabis product. This positioning enables distribution across both regulated and unregulated channels.
